STARTUP BREAKFAST · 15 OCTOBER 2026

CompassFinance

Your guide in finance.
Your AI tutor for investing.

A QUESTION TO START

If you had invested €100 in the S&P 500 at the start of 2015, today you would have

≈ €460

The market rewards those who start. CompassFinance helps young adults take that first step safely.

S&P 500 total return, dividends reinvested, January 2015 to 7 October 2026: about 14% a year, calculated in US dollars. Sources: slickcharts.com, officialdata.org. Past results do not guarantee future results.

WHY US · MEET THE FOUNDER

The AI behind Compass comes from our own research

Aleksandr Koviazin

PhD candidate · University of Luxembourg, SNT · AI and machine learning for finance

My research studies how several AI models can work together to make better financial decisions. The same idea powers Compass, our AI tutor. I also work with an industry research project.

BEFORE ACADEMIA

1M

communications a day. I led the phone-menu (IVR) and chatbot support team at the most popular bank in Russia.

RESEARCH UNDER PEER REVIEW

How fast does a learning algorithm improve, and exactly where does it get stuck? We derive the error curve exactly.

Submitted · AISTATS 2027

Can the results of multi-agent AI systems be repeated reliably? We study how reproducible they are.

THE PROBLEM

Young adults want to invest. Almost none know how to start.

Across Europe, 18–27 year-olds are a financially underserved generation: curious about building wealth, but locked out by jargon, fear of losing money, and apps built for people who already know what they are doing.

Beginner Explorer

Curious but scared of losing money. Needs confidence before risking a single euro.

Wealth Builder

Already saving and wants money working harder, but does not trust generic robo-advice.

Impact Investor

Wants first investments to reflect personal values, not just a ticker symbol.

EARLY VALIDATION

We started by listening to real users

Our first seven interviews, with young investors aged 27 to 34, point in the same direction.

They want it explained

All asked for plain explanations: of their reports, of what is happening in their portfolio, and “trust in a simple way”.

Trust decides it

One said they would trust it more if it came from their bank. Another asked for clear rules on advertising, commissions and legal protection.

They would use it daily

All said they would open an investing app every day, from once to several times a day.

OUR APPROACH

Three pillars, one guided path

Education

Bite-sized lessons on real assets, taught by Compass, our AI tutor. No finance degree required.

Exploration

Browse real markets (stocks, indices, commodities, crypto) with context before a single euro is at risk.

Activation

Practice with real prices in a risk-free paper portfolio, then graduate to investing with confidence.

VALUE PROPOSITION

We turn “I don’t know where to start” into a first real investment: safely, and on your terms.

€0

risk while learning. Practice first, invest second.

13

real assets to learn and trade, from indices to crypto.

1:1

AI tutor that adapts to each learner’s pace and goals.

WHAT IS BEHIND COMPASS

A patient tutor, not a black box

Compass is an AI that holds a natural conversation and explains investing in plain words.

It teaches, it does not guess

Every lesson is grounded in real market data and a fixed curriculum. Compass explains it; it does not make it up.

AI checkers review each other

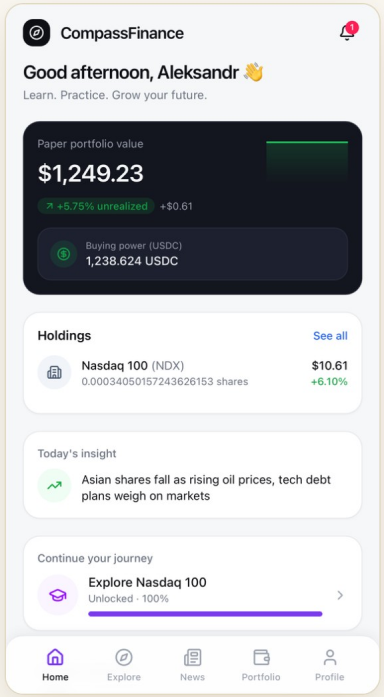

Before an answer reaches the user, a second AI step reviews it for accuracy. This multi-agent idea comes from our founder's academic research.

It adapts to you

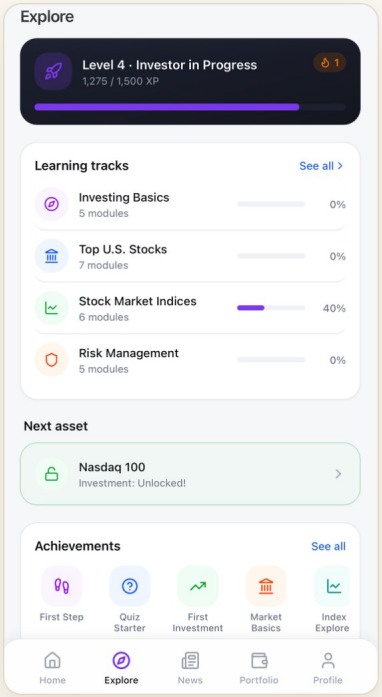

Compass tracks what each learner has mastered and adjusts pace and difficulty. No generic, one-size-fits-all script.

HOW WE GROW

Learning is the hook. Sharing is the engine.

1 Free education funnel

No-risk learning removes the biggest barrier to signing up, so acquisition cost stays low.

2 Built-in sharing

Every unlocked achievement and referral link is made to be shared with friends, at no cost to us.

3 Campus partnerships

Student organizations and universities across Luxembourg and the Benelux give us a trusted first audience.

4 Bank partnerships

We offer our education layer to retail banks as an onboarding tool for their younger customers.

COMPETITIVE LANDSCAPE

Everyone assumes you already know how to invest

	eToro, Trade Republic, Revolut	Alinea (US)	Composer (Composer by SoFi)	CompassFinance
Audience	Already-confident traders	US values-led beginners	Hobbyist strategy builders	European beginners, 18–27
Approach	Trading first; teaching is a side feature	Values-based portfolio matching	No-code AI trading strategies	Education first, AI-tutored
Start	Real money, day one	Real money, day one	Real money, for power users	Risk-free paper trading first
Growth	Paid ads, referral bonuses	Community, social mission	Strategy marketplace, SoFi reach	Education funnel, bank partners

Composer proves the AI opportunity is real: it made automated strategies easy to build and is now part of SoFi. But its audience is already financially literate. We own the step before: turning a total beginner into an investor.

MARKET SIZE

Starting in Luxembourg, built for a generation of 1.3 billion

≈ 85K

people aged 18–27 in Luxembourg. Our beachhead.

≈ 49M

people aged 18–27 across the EU. Our near-term market.

≈ 1.3B

people aged 18–27 worldwide. The long-term opportunity.

Sources: Eurostat (EU-27 and Luxembourg, 2025) and UN World Population Prospects 2024. Ages 18–27 are estimated from five-year age groups. The world figure uses the UN count for ages 15–24 (1.28 billion), a band of the same width.

RETURN FOR INVESTORS

How investors get their money back

1 Build and prove

We sign the first bank pilots and grow a base of active learners in Luxembourg.

2 Earn revenue

Money comes in from Compass+ subscriptions, referral fees when learners open real accounts, and fees from partner banks.

3 Sell or scale

Investors are paid when the company is sold to a bank, broker or fintech that wants our users, or when they sell their shares in a later funding round.

THANK YOU

Join us.

We want to be the compass in a generation's financial decisions. Help us build the guided path from "I don't know how" to "I just made my first investment."
